Current Activities

During this reporting period the Responsible Party's contractor, ERM Inc., continued weekly oil extraction activities. The total liquids extracted thru 10/31/06 includes 35,555gals of contaminated water and 3,958 gals of fuel oil. Weekly extraction events will continue.

On September 21, 2006 representatives from Fogle's, EMA, EPA and MDE met on site to discuss the draft Abatement Plan and to walk the site. Fogle's thru ERM, submitted the final Abatement Plan in mid October, 2006. MDE comments were not appropriately addressed and ERM is presently in the process of reworking the Plan. In the interim, ERM is completing the design for the insitu bio-remediation of the Fogle's property.

ERM and Fogle's personnel will continue to inspect and replace sorbents in the creek as part of the required work under this AOC.

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
